

**Amendment #2 to RFP: SJPC-CBRP6519 – Questions from Potential Bidders**

Q1. Is there a required raised height?

A1. No, only the required lowered height.

Q2. We have over 50+ options and attachments available for our units being that we are the manufacturer. If we were to add all standard options/attachments, the costs would take us out of contention.

A2. We regard all standard options/attachments to include:

- Side shifter
- Solid tire
- Double tire
- Cabin with heater and air conditioning (36k and 55k models, proposal can include prices for open back and enclosed cabins for 10k and 15k models with the above option)
- Front windshield
- Vertical exhaust
- Fire Extinguisher
- Hose Reel
- Rear Headlight
- Anti-start with key switch
- E-Brake safety switch
- Front or Rear LED work light
- Operator Fan (on cab, if applicable)
- Seatbelt
- Rear Grab Handle with horn
- High Air intake system
- Seatbelt use sensor
- Suspension seat

Q3. With these units being custom built, this time frame is not achievable. Currently, our manufacturing timeline is 120 Days ARO

A3. The delivery deadline is inflexible.

Q4. Enclosed cabinets? Do you mean a cabin? If so, would you like Air Conditioning? Our Cabin units already come with heaters.

A4. Yes, the original reply should have stated "cabin" and we would like air conditioning for enclosed cabin models.
