2. GIRTS AND SIDING
REPLACEMENT
APPROXIMATELY
145'X15' (2,100 S.F.)
LOOKING EAST

This is an aerial photograph of a large, flat roof of a building. The roof is covered with dark grey asphalt shingles. A red callout box with white text is positioned in the upper left quadrant of the roof. A red line with arrows at both ends extends horizontally from the center of the callout box across the roof, indicating a specific area of interest. The building's exterior walls are visible at the bottom and sides, showing a mix of grey and green siding. The surrounding area includes a parking lot with several vehicles and some construction materials on the ground.

2. GIRT AND SIDING
REPLACEMENT
140'X15' (2,100 S.F.)

The image shows the interior of a large industrial building. A yellow overhead crane is visible, with a red callout box pointing to a specific area on the upper wall. The callout box contains the text '2. GIRT AND SIDING REPLACEMENT 140'X15' (2,100 S.F.)'. In the foreground, there are stacks of materials, including a large stack of metal sheets on the left and a stack of blue plastic pallets on the right. The floor is concrete, and the ceiling is high with exposed steel beams and lights.
