

**Addendum 3**  
**July 20, 2023**  
**South Jersey Port Corporation (SJPC)**  
**Request for Proposals**

**SJPC-23-22 Broadway Terminal Solar PV Systems Project**

**NOTICE**

This Addendum is considered part of this Request for Proposals and must be acknowledged with your submission.

---

The following page(s) contain:

- Proposal Opening Extension
  - Additional Site Visit Opportunity
  - Formally submitted questions and SJPC responses
  - Attachment A - Billing History and Sample Invoices
  - Attachment B – Interior Photos
- 

**Proposal Opening Extension**

Due to the large volume of RFI questions received, SJPC will be extending the proposal opening date to Tuesday, August 15<sup>th</sup> 2023 at 11:00am. The question deadline has also been extended to Monday, July 31<sup>st</sup> at 5pm. Any questions received after that date and time will not be answered.

**Additional Site Visit Opportunity**

Please be advised that South Jersey Port Corporation will be holding an additional site visit at our Broadway Terminal (2500 S. Broadway, Camden, NJ 08101) on Wednesday, July 26<sup>th</sup> at 8:00am. Participants planning to attend this site visit must notify in advance Patrick Boyle, Purchasing Manager, by e-mail at [pboyle@southjerseyport.com](mailto:pboyle@southjerseyport.com).

**Formally submitted questions and SJPC responses**

- Q1      We were not able to see the electric gear in the main electric room and to properly estimate the costs for interconnection. We would need details on the current main gear where we have to tie into. Can an electric diagram of the existing gear and or pictures of the main switchgear be provided so we can see if there are any spares or locations to tie in? If this information is not available can a visit be arranged to the electric gear?

- A1. You will not be connecting to our switchgear which are secondary circuits. This will not be a behind the meter installation. You will be connecting directly to PSE&G transmission / distribution primary facilities which you need to work out with them.
- Q2. Can an electric bill be provided for the main electric service so that we can see what South Jersey Port is paying for electric?
- A2. Yes. See Attachment A which contains billing history and sample invoices.
- Q3. Since the site visit occurs after the July 17 deadline for questions, will questions regarding anything that may be discovered during the visit be accepted?
- A3. The deadline for questions will be extended to Monday, July 31<sup>st</sup>.
- Q4. Notes on Sheet S-2 require us to field verify all existing roof conditions. There is over 500,000 sf to field verify, including measurements, detail conditions, and multiple core samples for each roof area. We will not be able to accomplish this in a single day. Can we schedule an additional three (3) full days to complete field verifications?
- A4. An additional day for inspection will be held on Wednesday, July 26<sup>th</sup> from 8 AM until noon. Please provide the names to Patrick Boyle if you plan to attend.
- Q5. Please confirm that we will be allowed rooftop access and access to the interior of the buildings during the site visits.
- A5. Rooftop access and access to the interior of the buildings will be allowed during the site visits. See Attachment B for photos of the interiors of the building.
- Q6. Please provide structural and architectural details for the demolition and infill of the penthouses and skylights. Please show the type of deck to be installed and how it will be attached to the surrounding structure.
- A6. The design and details for the structural infill of the penthouses and skylights is the responsibility of the Proposer. The roofing system for each building is identified on the project plans and in the specifications. The framing and decking for any infill areas shall be designed to meet the load requirements for the roof and the solar system. This is part of the design/build requirements of the project where the solar system provider shall design and provide structural calculations to verify the existing structure will support the proposed solar array system. This includes any infill areas of the roof structure. Refer to sections 3.9, 3.12, and 3.13 of the specifications.
- Q7. Please confirm that all structural decking will be removed in steep-slope areas that will receive new metal roofing.
- A7. The table on Sheet S-2 identifies the roof areas where the decking is to be removed. This includes all sloped roof areas.
- Q8. Please provide existing structural purlin spacing for the areas to receive new metal roofing over open framing.

- A8. The purlin spacing may vary for the different buildings. The Proposer is responsible to field verify the different spacing of the purlins.
- Q9. Detail 9/D-2 shows new metal coping. Is the nailer shown in this detail existing or new?
- A9. The wood nailer blocking is proposed to be new. If there is an existing nailer in good condition, it may be used for the new metal coping. This shall be reviewed by the engineer and roof system manufacturer in order to meet roof warranty requirements.
- Q10. Some of the existing parapets that receive new coping currently have a stone/cement cap or a terra cotta cap. What should be done with these existing caps?
- A10. The stone, concrete, or terra cotta caps shall be removed and disposed of; and a new metal cap shall be installed.
- Q11. Is the nailer shown on gutter detail 8/D-2 new or existing?
- A11. The wood nailer blocking is proposed to be new. If there is an existing nailer in good condition, it may be used for the new metal coping. This shall be reviewed by the engineer and roof system manufacturer in order to meet roof warranty requirements.
- Q12. The Roof Area Summary of Work chart on sheet S-2 calls for either no insulation (Buildings A, F, & N) or R-30 insulation (Buildings I, P, P-1, and P-2). Section 075400, paragraph 2.02.A.7 specifies R-20 insulation. Which prevails, the chart in the plans, or the specification?
- A12. The specification value of a minimum R-20 insulation is required. As noted on the plans all TPO roof areas are required to have proper slope in accordance with the roof manufacture requirements. Therefore, tapered insulation may be required to provide the minimum required slope. Therefore, the R-value may vary based on the different thickness of the insulation.
- Q13. Specification Section 075400 requires the new TPO roof to be fully adhered. On Sections where there is no insulation being installed (Buildings A, F, & N), the basis-of-design manufacturer will only provide the 20-year warranty if the existing wood deck is mechanically fastened with screws, not nails. Are the wood decks on these three (3) buildings mechanically attached with screws? If not, how should the assembly be modified to provide the specified warranty?
- A13. All TPO roof areas shall have rigid insulation mechanically fastened to the roof deck with a minimum insulation thickness that meets the requirements of the roofing manufacturer in order to provide the required warranty. Therefore, buildings A-1, F, & N shall have rigid insulation. The table on sheet S-2 shall be considered, with insulation to be provided for these roof areas.
- Q14. According to the Roof Area Summary of Work chart on sheet S-2, Building N has both a wood and a metal deck. No new insulation is included on this building. TPO cannot be installed directly over metal deck without insulation or a cover board. What type and thickness of board should be installed over the metal deck areas on Building N?
- A14. Refer to answer A13.

- Q15. Specification 075400, paragraph 3.04 requires installation of an air/vapor barrier. Which buildings require the air/vapor barrier to be installed? If a barrier is required, please provide a material specification as one is not listed in Part 2 of the specification.
- A15. The air/vapor barrier in section 075400, 3.04 is not required at any locations.
- Q16. Specification 075400, paragraph 2.07.D.1 lists simulated standing seam ribs. On what roof areas will these be installed? Please provide an installation specification stating the spacing for the ribs.
- A16. The simulated standing seam ribs in section 075400, 2.07.D.1 is not required at any locations.
- Q17. Specification 075400, paragraphs 3.05.B & C outline 10 or 11 different methods for installing the insulation. Which should be utilized for the base layer of insulation? Which should be utilized for the subsequent layer of insulation?
- A17. All rigid insulation is to be mechanically fastened to the roof deck. Therefore, only items referring to mechanical fasteners shall apply.
- Q18. Sheet S-6 shows the low-slope areas of Buildings P and P-1/P-2 with a dark gray hatch indicating those roofs are not included in scope. Will these areas be reroofed?
- A18. The dark gray hatch for these buildings shall not apply. Building P, P-1, & P-2 shall be included in the scope of work and shall have the roof removed and replaced with a new roof system as per sheet S-10.
- Q19. Sheet S-6 shows the steep-slope areas of Building P-1/P-2 with a slanting hatch indicating those roofs are to be demolished. These areas are not referenced in the Roof Area Summary of Work chart. How should these steep-slope areas be addressed?
- A19. The steep sloped areas shown adjacent to buildings P-1 and P-2 on sheets S-2, S-6 and S-10 are not in the scope of work and shall not be demolished.
- Q20. Could you please provide us with labelling of the Docks? E.g. I am seeing on the SLDs, Transformers corresponding to certain docks, but we are unable to co-relate where the Transformer is located. If we know the Transformer locations, it would help us determine the Interconnection Plan.
- A20. There will be no connection to the SJPC facilities. Refer to answer A1.
- Q21. Due to the fact that there will be an additional site visit on July 18th, can the question submission deadline be pushed back until after this date to allow for clarifications from anything that arises from the visit?
- A21. Refer to answer A3.

- Q22. Pg. 21 says the proposer must also furnish a price for all Optional Bids or Alternates requested, as well as all separate unit price items requested. Failure to do so will constitute an incomplete bid, which will be rejected by the South Jersey Port Corporation. Alternative Bid 1 is requested for a behind the meter system via a PPA which the SJPC team said was not an option. Therefore, can this statement be adjusted so a proposal without a PPA option is not deemed incomplete and rejected?
- A22. The Alternate 1, which is a combination of Community Solar + PPA, as shown on page 3 Of 6 of the proposal form, is not a requirement of the bid proposal. Therefore, the statement on Pg. 21 that the bid is incomplete and will be rejected does not apply for the Alternate.
- Q23. Are there any fees associated with this RFP for engineering (RVE), other consultants and/or legal that proposal must consider when pricing their bids?
- A23. There are no additional fees for RVE or consultants for SJTA. However, this is a design/build type project where the proposer will be responsible for all design issues and costs associated with the roof replacement and solar array installation and operation.
- Q24. In the insurance requirement section, it lists both "Installation Floater" and "Builder's Risk". Would SJPC require both?
- A24. Based on the Proposer's Scope of Work, either the Installation Floater or the Builders Risk may apply. There is no requirement for both. The proposer shall provide insurance that clearly indicates coverage for any damages to the owner's property or loss of business.
- Q25. RFP states that there is a maximum of 25-year period. The NJ community solar program allows a project to operate for 20 years. Would SJPC consider a 20-year lease with three 5-year extensions (up to 35 years)?
- A25. Yes, SJPC will consider alternate time periods when reviewing the proposals. This shall be clearly explained in the proposal including the responsibilities and rights each party has for extending the contract.
- Q26. On the Bid Cost Summary Sheet, would SJPC consider including a field for "Lease payment to SJPC in \$/MW"? This would help compare rates easier especially given that system sizes could change.
- A26. The Proposer is allowed to provide additional financial information or cost summaries to the Bid Cost Summary Form in order to further clarify their proposal for meeting the project goals.
- Q27. On the Bid Cost Summary Sheet, there is a request for the "Community Solar Customer Rate (year 1)". The NJ Community Solar Permanent program has not been established and this value is dependent on the utility cost of energy, the discount rate agreed upon by the project owner, a customer's status (as low-to-moderate income) and, in some cases a customer's job (high discounts for first responders, etc.). The cost of energy in \$/kwh sold by a community solar project also has little/no bearing to the host site. Would SJPC consider removing this field?

- A27. The Proposer may provide an alternate format to the Bid Cost Summary Sheet that can more clearly identify their costs and revenue for the project. Also, refer to answer A26.
- Q28. Is SJPC or any tenant thereof requesting or expecting to be an off taker of the community solar project?
- A28. No
- Q29. On the Bid Cost Summary Sheet, would SJPC consider adding a lease rate adjuster per \$10,000 of structural and/or utility upgrade costs (excluding standard transformer, telemetry, and reclosers) that may be incurred post structural and interconnection feasibility analysis? OR is SJPC open to including these as exclusions to the bid lease rate?
- A29. Refer to answers A26 and A27.
- Q30. Does SJPC have a preferred location for the project's transformer to be located?
- A30. Not at this time. This will have to be coordinated during the design phase.
- Q31. Since the bid is for a community solar lease only, does SJPC still require a PV Watts production analysis or is a Helioscope design with production information acceptable?
- A31. Refer to answers A26 and A27.
- Q32. Is there a reason why "Experience and Qualifications" is worth the least points in the Evaluation Criteria?
- A32. No.
- Q33. Would a bid due extension be considered? The extent of the roofing scope will most likely necessitate multiple site visits to confirm and measure existing conditions.
- A33. The bid opening date is extended to Tuesday, August 15<sup>th</sup>.
- Q34. Has any ACM testing been performed on the roof and flashings with existing Bituminous Membranes? If so, please provide the results. This would help avoid any change orders to the roofing scope.
- A34. There were no core samples taken of the built-up roof systems and no ACM testing of the existing roof and flashings. Based on the history and age of the buildings, the demolition of the roof shall consider there are two layers of bituminous roofing on top of old Cellotex insulation installed on 2 inch thick wood decking.
- Q35. Project Requirements 2.2.1.4 specifies tapered insulation for roofs A-1, F, I, P, P1/2 and N but does not specify tapered slope required. Please provide required slope and min thickness at drain/gutter.

- A35. The required roof slope shall meet the roofing manufacturer's minimum requirements. The minimum insulation requirement is an R-20, which will be an average over the tapered insulation. The minimum thickness at low areas of drain or gutter shall be 1 ½". Also refer to answers A12 and A13.
- Q36. Primer requirement for metal roof coating – Specification 070160-9 part 3.03.D states no primer is needed if adhesion test results are satisfactory to the manufacturer otherwise primer may be required. Has the specified manufacturer performed an adhesion test, if so, please provide results or provide areas on drawings where primer is needed. If adhesion test is to be performed as part of the work and results indicate primer is needed will a change order be authorized by the owner?
- A36. There was no adhesion test performed. There will be no change orders approved by SJPC. This is a design/build type project and any changes to the design are the responsibility of the Proposer.
- Q37. Project Requirements 3.2.1.10 specifies to replace roof joists on E-SW CORNER roof. Drawings or specifications do not specify size, type of joists required, drawings for attachment, or uplift requirements. Will structural engineering be completed in order to properly price this work?
- A37. The area on the E-SW CORNER roof is identified on sheets S-2, S-3, S-7, and noted in section 3.2.1.10. This area shall receive structural framing over the existing flat roof area to match the existing sloped roof area in order to receive a metal roof system. Also refer to photos on pages 270, 271, and 273 for this area. This is part of the design/build contract and the responsibility of the Proposer.
- Q38. Drawing S-2 – Roof Area Summary of Work Table – Roof Area F says proposed insulation is “NONE”, however Part 2: Project requirements 2.2.1.4 says to include flat and taper insulation. Please provide expected insulation specifications for this roof area.
- A38. Refer to answers A12 and A13.
- Q39. All roof sections requiring deck removal – Please specify decking type and fastening/uplift requirements for deck replacement.
- A39. The decking to be removed is identified in the table on sheet S-2. The metal roofing is to be installed on purlins unless noted. There is no deck replacement for these areas.
- Q40. What is the electric usage in total at the South Jersey Port site? What is the electric usage at each of the buildings at the site?
- A40. Refer to answer A2.
- Q41. What obstacles and structures are going to be removed from the rooftops as part of the roofing project?

- A41. All penthouse structures and skylights shall be removed from the rooftops. These are shown on the plans and noted in the table on sheet S-2. Structural framing shall then be constructed in order to support the roof and solar array system. Refer to answer A6.
- Q42. Are any structural diagrams or pictures of structural for any of the buildings?
- A42. There are no structural plans available for these buildings. Interior photos of some of the buildings are attached. Attachment B.
- Q43. Please confirm that under the Alternate Bid, the system should be designed so that some of the solar generation will offset the site load under a PPA pricing structure.
- A43. Refer to answer A22.
- Q44. Please provide annual electric usage information so we can appropriately calculate Anticipated Behind the Meter Power Consumption for a PPA scenario.
- A44. Refer to answers A1 and A2.
- Q45. The Project Proposal form asks for the Community Solar Customer Rate. Can this be filled out as a percentage of subscriber customer electric costs as opposed to a rate in dollars per kWh?
- A45. Refer to answers A26 and A27.
- Q46. Please clarify what each column in the cost structure spreadsheets are intended for. Please provide guidance as to how the spreadsheet should be populated.
- A46. Refer to answers A26 and A27.

## Electric supply charges - ENGIE Power & Gas LLC

Through the CHOICE Program, you have chosen to purchase electricity from ENGIE Power & Gas LLC. If you have any questions about the electric supply charges below, please contact them directly at (855) 327-6937.

Adjustments	\$0.00
Current charges	\$55,539.37

 **Total ENGIE Power & Gas LLC  
Charges** **\$55,539.37**

## Details of your electric charges

Your rate: High Tension Service (HTS)

Meter # 5319814	Usage
Reading Jan 9, 2023	
On-Peak Actual	10209
Reading Dec 8, 2022	
On-Peak Actual	10105
Multiplier	7,200
Total On kWh	339,662
Total Off kWh	405,233
<b>Total kWh</b>	<b>744,895</b>

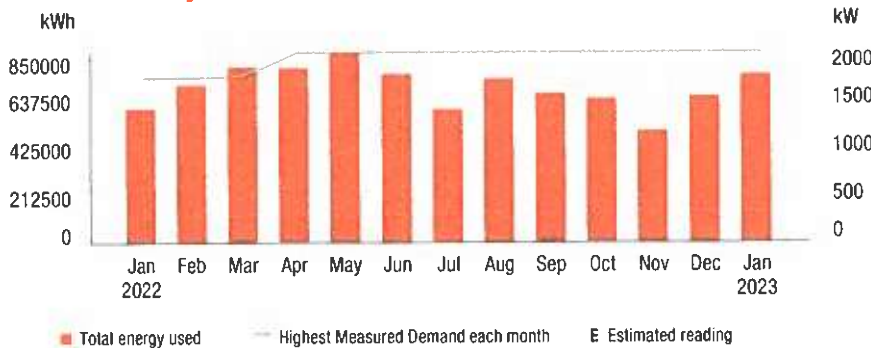

### Delivery charges

Monthly service charge		\$2,038.02
Charges for delivering electric to you:		
Annual Demand	1,952.600 kW x \$1.179397	\$2,302.89
	<i>The highest Measured Demand over the most recent 12 months.</i>	
kWh - On-peak	339,662 kWh x \$0.006596	\$2,240.41
	<i>Energy consumed between 8am-10pm, Monday to Friday.</i>	
kWh - Off-peak	405,233 kWh x \$0.006596	\$2,672.92
	<i>Energy consumed outside peak hours.</i>	
Societal Benefits	744,895 kWh x \$0.010173	\$7,577.82
	<i>This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.</i>	
<b>Total electric delivery charges</b>		<b>\$16,832.06</b>

**Total electric charges \$16,832.06**

### Your monthly electric use

Visit MyAccount for more details regarding your energy usage.

### MEASURED DEMAND

On-Peak kW	1,719.40
Off-Peak2 kW	1,512.00

Measured Demand is the maximum use of electricity at any time during a monthly time period, as measured by your meter.

### BILLED DEMAND

Annual Demand kW	1,952.60
------------------	----------

### SUPPLY CAPACITY

Generation kW	976.966
Transmission kW	1,085.835

Supply capacity is required to serve the system's annual peak usage. It represents your share of these facilities, in kilowatts (kW). It is calculated based on your peak usage from the previous summer. Supply capacity values are updated periodically throughout the year and are prorated based on your service period.

### Price to compare

You are currently buying your electricity from another supplier. If you had been purchasing your electric supply from PSE&G, your cost would be \$108,713.75. This is your *price to compare*. It varies from month to month depending on your usage.

**Your PoD ID is: PE000008895352644785** -  
 Your PoD ID is your Point of Delivery identification within PSE&G's system.

PAY

# Your energy bill

Bill date: February 10, 2023  
For the period: January 10, 2023 to February 07, 2023

## Message Center

This bill reflects increases in the Delivery and Supply portions of your electric bill effective on and after February 1, 2023. The changes in the Delivery portion are due to increases in the Zero Emission Certificate Recovery Charge and the Solar Pilot Recovery Charge. The change in the Supply portion is the result of changes to the Transmission rate. The overall increase for business customers will vary by individual customer usage. Tariff information may also be found by visiting pseg.com.

PSEG is proud to be named to the Dow Jones Sustainability Index and to Newsweek's America's Most Responsible Companies 2023 list. These prestigious honors demonstrate PSEG's ongoing commitment to environmental, social and governance (ESG) initiatives.

Heating can be a big part of your business's energy costs. To save energy and money, we recommend setting thermostats between 66°F - 68°F during heating months. For more tips, visit pseg.com/bizenergytips.

On-Peak Actual	10298
Reading Jan 10, 2023	
Less On-Peak Actual	10209
Multiplier	7,200
Total On kWh	309,558
Total Off kWh	330,560
<b>Total kWh</b>	<b>640,118</b>

### Delivery charges

Monthly service charge		\$2,038.02
Charges for delivering electric to you:		
Annual Demand	1,952.600 kW x \$1.179397	\$2,302.89
<i>The highest Measured Demand over the most recent 12 months.</i>		
kWh - On-peak		
For the first	233,716 kWh x \$0.006596	\$1,541.59
For the next	75,842 kWh x \$0.006701	\$508.22
kWh - Off-peak		
For the first	247,586 kWh x \$0.006596	\$1,633.08
For the next	82,974 kWh x \$0.006701	\$556.01
Societal Benefits	640,118 kWh x \$0.010173	\$6,511.92
<i>This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.</i>		
<b>Total electric delivery charges</b>		<b>\$15,091.73</b>

**Total electric charges \$15,091.73**

### MEASURED DEMAND

On-Peak kW	1,451.50
Off-Peak2 kW	1,365.10

Measured Demand is the maximum use of electricity at any time during a monthly time period, as measured by your meter.

### BILLED DEMAND

Annual Demand kW	1,952.60
------------------	----------

### SUPPLY CAPACITY

Generation kW	976.966
Transmission kW	1,085.835

Supply capacity is required to serve the system's annual peak usage. It represents your share of these facilities, in kilowatts (kW). It is calculated based on your peak usage from the previous summer. Supply capacity values are updated periodically throughout the year and are prorated based on your service period.

### Price to compare

You are currently buying your electricity from another supplier. If you had been purchasing your electric supply from PSE&G, your cost would be \$47,837.00. This is your price to compare. It varies from month to month depending on your usage.

**Your PoD ID is: PE000008895352644785** - Your PoD ID is your Point of Delivery identification within PSE&G's system.

## Message Center

Whether you're building a backyard patio, installing a new fence or expanding the footprint of your business, call before you dig! You or your contractor must call the New Jersey One-Call Center at 1-800-272-1000 or 811 three business-days before starting any work that involves digging. It's the law. See the enclosed insert or pseg.com/safedigging for more information.

Be aware of electric lines when working outside! Keep a safe distance from them when using or carrying a ladder and don't trim tree branches if a power line or other overhead wires are running through them. Use caution when working in areas where the electric-service cable enters your home.

PSE&G is installing smart meters that will provide electric customers with a number of benefits. These include more detailed electric-use information, near real-time power outage detection, and the elimination of almost all estimated electric bills. To learn more, visit pseg.com/smartmeters.

Total Off kWh	343,837
<b>Total kWh</b>	<b>654,175</b>

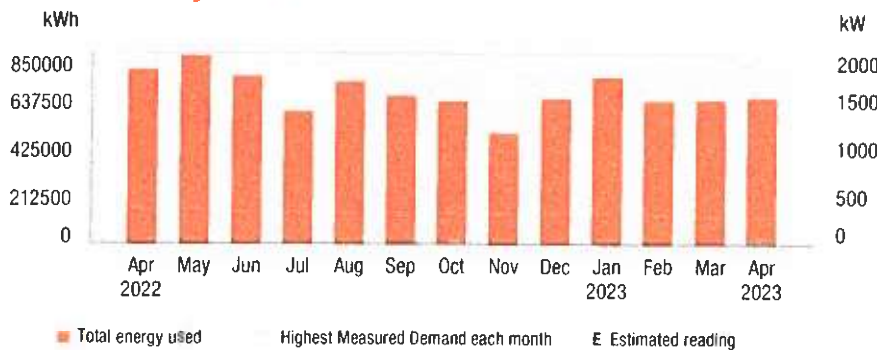

### Delivery charges

Monthly service charge		\$2,038.02
Charges for delivering electric to you:		
Annual Demand	1,762.600 kW x \$1.179400	\$2,078.81
	<i>The highest Measured Demand over the most recent 12 months.</i>	
kWh - On-peak	310,338 kWh x \$0.006701	\$2,079.57
	<i>Energy consumed between 8am-10pm, Monday to Friday.</i>	
kWh - Off-peak	343,837 kWh x \$0.006701	\$2,304.05
	<i>Energy consumed outside peak hours</i>	
Societal Benefits	654,175 kWh x \$0.010173	\$6,654.92
	<i>This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.</i>	
<b>Total electric delivery charges</b>		<b>\$15,155.37</b>

**Total electric charges \$15,155.37**

### Your monthly electric use

■ Total energy used    ■ Highest Measured Demand each month    E Estimated reading

Visit MyAccount for more details regarding your energy usage.

#### MEASURED DEMAND

On-Peak kW	1,425.60
Off-Peak2 kW	1,321.90

Measured Demand is the maximum use of electricity at any time during a monthly time period, as measured by your meter.

#### BILLED DEMAND

Annual Demand kW	1,762.60
------------------	----------

#### SUPPLY CAPACITY

Generation kW	976.966
Transmission kW	1,085.835

Supply capacity is required to serve the system's annual peak usage. It represents your share of these facilities, in kilowatts (kW). It is calculated based on your peak usage from the previous summer. Supply capacity values are updated periodically throughout the year and are prorated based on your service period.

#### Price to compare

You are currently buying your electricity from another supplier. If you had been purchasing your electric supply from PSE&G, your cost would be \$34,666.51. This is your *price to compare*. It varies from month to month depending on your usage.

Your PoD ID is: PE000008895352644785 -  
Your PoD ID is your Point of Delivery identification within PSE&G's system.

# Your energy bill

Bill date: May 12, 2023  
For the period: April 11, 2023 to May 09, 2023

## Message Center

This bill reflects BPU-approved changes in the Electric Supply and Delivery portions of your bill effective on and after May 1, 2023. The increase in the Supply portion of your bill is due to a change in the Transmission rate. The increase in the Delivery portion of your bill is due to the implementation of the Energy Strong II program. The overall impact for business customers will vary by individual customer usage. Tariff information may also be found by visiting pseg.com.

J.D. Power named PSE&G #1 in customer satisfaction for both Residential Electric and Natural Gas Service in the East among Large Utilities. On behalf of the more than 12,000 PSEG employees who work hard every day, we thank you for rating us as a top utilities provider. For J.D. Power 2022 award information, visit jdpower.com/awards.

**Beware of payment scams.** If you receive a phone call demanding immediate bill payment with Bitcoin or a prepaid card, it is a scam. When in doubt, hang up and call the number listed on your bill: 1-800-436-7734. For more information, visit pseg.com/scamalert.

Bill date: June 13, 2023  
For the period: May 10, 2023 to June 08, 2023

## Message Center

This bill reflects BPU-approved changes in the Supply and Delivery portions of your electric bill effective on and after June 1, 2023. The increase in the Supply portion of your bill is a result of the statewide supply auction that was approved by the BPU on February 8, 2023. The increase in the Delivery portion of your bill is due to changes in the Electric Conservation Incentive Program and in the Green Programs Recovery Charge. The overall impact for business customers will vary by individual customer usage. Tariff information may also be found by visiting pseg.com.

Check your inbox, not your mailbox! With Paperless Billing, you'll get a monthly email showing your bill amount and due date, with the ability to view or print your current and past bills anytime, anywhere. To sign up, log in to My Account at pseg.com, and select "Paperless Billing."

## Message Center

**New! Report and track a streetlight outage with our Streetlight Outage Map.** Visit [pseg.com/StreetlightMap](http://pseg.com/StreetlightMap) or download our free app.

**Mylar balloons can cause power outages if they drift into power lines.** Be sure to secure these metallic balloons and safely puncture them before disposing. To report a balloon caught in a power line, call PSE&G at 1-800-436-7734. Do not try to dislodge it.

**J.D. Power named PSE&G #1 in customer satisfaction for both Residential Electric and Natural Gas Service** in the East among Large Utilities. On behalf of the more than 12,000 PSEG employees who work hard every day, we thank you for rating us as a top utilities provider. For J.D. Power 2022 award information, visit [jdpower.com/awards](http://jdpower.com/awards).

**Message Center** (Continued from page 1)

Si desea recibir en español una notificación de desconexión del servicio, llame al **1-800-357-2262**.

**Call before you dig when starting a major project that involves digging.** Even if you think there are no underground utility lines near your project, you must call the New Jersey One-Call Center at 1-800-272-1000 or 811 at least three business-days before any work begins. It's the law.

**PSE&G is installing smart meters that will provide electric customers with a number of benefits,** including more detailed electric-use information, near real-time power outage detection, and the elimination of almost all estimated electric bills. To learn more, visit [pseg.com/smartmeters](http://pseg.com/smartmeters).

**Stay informed during storms!** We work year-round to prepare for severe weather and want you to be ready too. Our online Outage Center offers many ways to stay in touch and informed before, during and after a storm. Visit [pseg.com/outagecenter](http://pseg.com/outagecenter) to learn more or see the enclosed "Working for you" newsletter.

**Put our tools to work for your business!** For easy access to tips, programs and information to help your business save time, energy and money, visit [pseg.com/bizsavings](http://pseg.com/bizsavings).

**At PSE&G, we are committed to supporting your business needs.** That's why we have a dedicated, toll-free phone number to address your energy questions and concerns. PSE&G's Business Solutions Center is available Monday-Friday, 8:00 a.m. - 5:30 p.m. at 1-855-249-7734 (1-855-BIZ-PSEG).

**Don't miss your meter reading**

If you'll be away on your meter reading day, use our mobile app to upload a picture of your meter or enter your reading manually, or call 1-800-622-0197.

**Electric & Gas Rate Information**

For news about PSE&G's rate filing and upcoming public hearings visit [www.pseg.com/pseandgfilings](http://www.pseg.com/pseandgfilings). Under applicable tax law, the State Sales and Use Tax and corporate business tax are imposed upon the energy you have used.

## Details of your electric charges

Your rate: High Tension Service (HTS)

<b>Meter # 5319814</b>	<b>Usage</b>
Reading Jul 10, 2023	
On-Peak Actual	10677
Reading Jun 9, 2023	
<b>Less</b> On-Peak Actual	10606
Multiplier	7,200
Total On kWh	251,538
Total Off kWh	264,010
<b>Total kWh</b>	<b>515,548</b>

### Delivery charges

Monthly service charge		\$2,038.02
Charges for delivering electric to you:		
Annual Demand	1,762.600 kW x \$1.202099	\$2,118.82
	<i>The highest Measured Demand over the most recent 12 months.</i>	
Summer Demand	1,330.600 kW x \$4.345401	\$5,781.99
	<i>The Measured Demand (excluding off-peak) in each billing month of June through September.</i>	
kWh - On-peak	251,538 kWh x \$0.009070	\$2,281.45
	<i>Energy consumed between 8am-10pm, Monday to Friday.</i>	
kWh - Off-peak	264,010 kWh x \$0.009070	\$2,394.57
	<i>Energy consumed outside peak hours.</i>	
Societal Benefits	515,548 kWh x \$0.010173	\$5,244.67
	<i>This charge recovers the cost of government mandated programs designed to achieve public policy goals, such as energy conservation.</i>	
<b>Total electric delivery charges</b>		<b>\$19,859.52</b>

**Total electric charges \$19,859.52**

### MEASURED DEMAND

On-Peak kW	1,330.60
Off-Peak2 kW	1,270.10

Measured Demand is the maximum use of electricity at any time during a monthly time period, as measured by your meter.

### BILLED DEMAND

Annual Demand kW	1,762.60
Summer Demand kW	1,330.60

### SUPPLY CAPACITY

Generation kW	1,324.306
Transmission kW	1,085.835

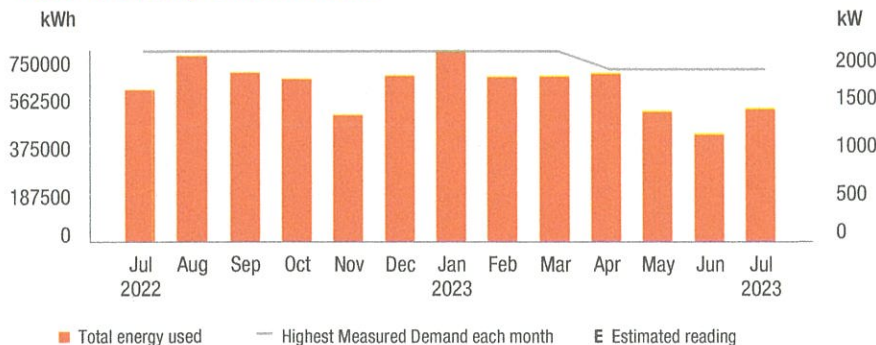

Supply capacity is required to serve the system's annual peak usage. It represents your share of these facilities, in kilowatts (kW). It is calculated based on your peak usage from the previous summer. Supply capacity values are updated periodically throughout the year and are prorated based on your service period.

### Price to compare

You are currently buying your electricity from another supplier. If you had been purchasing your electric supply from PSE&G, your cost would be \$48,780.02. This is your *price to compare*. It varies from month to month depending on your usage.

**Your PoD ID is: PE000008895352644785** – Your PoD ID is your Point of Delivery identification within PSE&G's system.

### Your monthly electric use

Visit MyAccount for more details regarding your energy usage.
